DETAILED ACTION

Receipt is acknowledged of the Amendment filed 8-9-2005.

Allowable Subject Matter

Claims 1-20 are allowable over the prior art of record.

The following is an Examiner's Statement of Reasons for Allowance: Although, How et al. (US PAT No. 6,242,767) discloses a customizable ASIC routing architecture, How et al. differs from the present claimed invention because, among other things, How et al. pertains to the specifics of two selectable manufacturing configurations where memory circuits are formed on a second module layer in a first manufacturing configuration to control a portion of circuit blocks in a first module layer and in a second selectable configuration a conductive pattern is formed on the second module layer to control substantially the same portion of the circuit blocks (claim 1) and a third module layer having two selectable manufacturing configurations where the third module layer comprising a RAM element in a first selectable configuration and a ROM element in a second selectable configuration (claim 17), and a non-planar memory circuit being either a RAM storing data to define the logic output of the digital circuit or a ROM conductive pattern defining the logic output of the digital circuit where the ROM and the ROM options provides substantially matching functionality and timing characteristics (claim 20). Accordingly, one of ordinary skill in the art would not have been motivated to modify the teachings of How et al. to meet the claimed limitation as set forth in the present claimed invention.

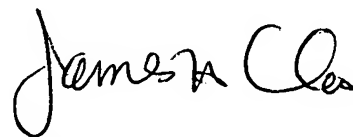

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
